Companion File Name format And Version	Date This File Generated archive Version Number	Table Explanation Of Zero Or Negative Values	Table Explanation Of Reported Detection Limit Values
None ; None	2006/06/30 ; 1	The Mfg states values of -5 to 2 as inst. noise which falls within the insts 0 range. However, until DLs are verified, 0 and neg. values in this file are flagged V4 and other values are flagged V0 unless there is a known reason to flag them otherwise.	We plan to determine detection limits based on the manufacturer's documentation and additional data analysis for use in a later version of this file.

Table Explanation Of Reported Uncertainty	Table User Note	Table User Note2	Table User Note3	Table User Note4	Table Name
See *TABLE USER NOTE2	Particle Mass 1 Hour Concentrations	Uncertainty is not reported in this file. However, uncertainties for longer time averages may be estimated as the standard error of the average of the 1-hour data. The final Project Report will discuss uncertainty in more depth. NARSTO Standard Flags

Flag: NARSTO	Description
H1	Historical data that have not been assessed or validated
M1	Missing value because no value is available
M2	Missing value because invalidated by data originator
V0	Valid value
V1	Valid value but comprised wholly or partially of below detection limit data
V2	Valid estimated value
V3	Valid interpolated value
V4	Valid value despite failing to meet some QC or statistical criteria
V5	Valid value but qualified because of possible contamination (e.g., pollution source, laboratory contamination source)
V6	Valid value but qualified due to non-standard sampling conditions (e.g., instrument malfunction, sample handling)
V7	Valid value but set equal to the detection limit (DL) because the measured value was below the DL
